Created to work with nature, Pennington® Rejuvenate™

essential plant nutrients. Your garden will be bursting

with bigger blooms compared to unfed plants. This blend

of organic and natural ingredients combines earthworm

castings, beneficial microorganisms such as microbes and

THESE INGREDIENTS WON'T BURN PLANTS WHEN USED AS DIRECTED

In 1945 we planted our roots to help you create the lawns and gardens of your dreams. You see, we don't see yards as curb appeal, but rather as a little slice of earth to call your own. A living breathing ecosystem where you can plant your roots, and nurture them from the soil up. A space for creativity

and celebration with those we love most. Whether it's seed, soil, fertilizer, flowers or bird feed, we believe our products should work with nature, not against it. The way mother nature intended.

DIRECTIONS FOR USE:

NEW PLANTS 10 sq. ft.: Sprinkle 1-2 cups evenly over

Initial Feeding

area to be planted. Mix it into the soil to a depth of 3-6 inches, along with any compost or other soil amendments you are adding.

In Ground plant: Mix 2 tbsp. into the soil at the bottom of the planting hole and into the soil backfill.

For container plants: Mix 2 tbsp. into

the top layer of soil in the container.

of the planting hole and into the soil backfill. Sprinkle 1 cup on top of soil six inches from the base of plant.

Large Areas: Sprinkle 1½ cups

10 sq. ft.: Sprinkle 2-3 cups evenly

alongside every 25 feet of row

10 sq. ft. of planting area.

over the soil or mulch.

PLANTING TIPS FOR BEST RESULTS 10 sq. ft. = 1'x10' or 2'x5' Over-feeding flowering plants can give you smaller and fewer blooms Follow the application amounts for best results.

2 Do not let the roots directly touch the plant food. Keep the plant food off leaves or wash it off with water.

After putting fertilizer down, mix it lightly into the soil, where possible. Always water the plants and soil well, after adding fertilizer.

ESTABLISHED PLANTS
